Harvesting system for different varieties of crops, ex. grains and rice .

Transport trailers in various designs.

Light equipment for soil preparation.

Special seeding discs for special conditions.

Mats Andersson, agricultural machinery engineer. Inventor of the MacTrac

MacTrac is easy to use and maintain, it's also great fun to drive it, which attracts the younger generation.

It's possible to mount tools both in the front and in the back.

There are various tools available for the MacTrac.
